We are not the sons of God  
We are not His chosen people now  
We have crossed the path He trod  
We will feel the pain of His beginning

Shadow fingers rise above  
Iron fingers stab the desert sky  
Oh behold the power of man  
On its tower, ready for the fall

Knocking heads together well  
Raze a city, build a living hell  
Join the race to suicide  
Listen for the tolling of the bell

Out of the the universe, a strange love is born  
Unholy union, trinity reformed

Yellow sun its evil twin  
In the black the wings deliver him  
We will split our souls within  
Atom seed to nuclear dust is riven

Out of the the universe, a strange love is born  
Unholy union, trinity reformed

Out of the darkness, brighter than a thousand suns  
Out of the darkness, brighter than a thousand suns  
Out of the darkness, brighter than a thousand suns  
Out of the darkness, brighter than a thousand suns

Out of the darkness, brighter than a thousand suns  
Out of the darkness, brighter than a thousand suns

Bury your morals and bury your dead  
Bury your head in the sand  
E equals MC squared you can relate

How we made God with our hands

Whatever would Robert have said to his God  
About he made war with the sun  
E equals MC squared you can relate  
How we made God with our hands

All nations are rising through acid veils of love and hate  
Chain letters of Satan, uncertainty leads us all to this  
All nations are raising through acid veils of love and hate  
Cold fusion and Fury

Divide and conquer while ye may  
Others preach and others fall and pray  
In the bunkers where we'll die  
There the executioners they lie  
Bombers launch with no recall  
Minute-warning of the missile fall  
Take a look at your last sky  
Guessing you won't have the time to cry

Out of the the universe, a strange love was born  
Unholy union, trinity reformed

Out of the darkness  
Out of the darkness  
Out of the darkness, brighter than a thousands suns  
Out of the darkness, brighter than a thousands suns  
Out of the darkness, brighter than a thousands suns  
Out of the darkness, brighter than a thousands suns  
Out of the darkness, brighter than a thousands suns

Holy Father we have sinned
