"We Kill Everything"

In the hulking halls of hatred where the Master makes
his throne
Within the "ass"-teroid belt where his body floats alone
his mind begins to wander
the worm begins to turn
all life he must now squander
the universe must burn
He plans eternal war, as the eternal way
But there is a force - which he must now obey
Time and the events within, chronicles of hate and sin
Everything, it has a start, but the end is always the best
part
Our quest - to find the broken bits
Put them back and make them fit
And once that we have read the end
The tablet will blow up again (x4)
And we'll kill everything (x3)
Including ourselves
Summoning the Master
Call his form most vile
Champing mass of questing flesh
Protoplasmic pile
Ancient hunger, never filled
until the universe is killed
The endless host of merging soul
Sucked into the feeding hole
Guts and giblets cascade down
Rectal midgets, flattened ground
Please pay attention to the plot

As I kick out this monster's snot
Splitting skulls and raking ribs,
Trephinated drainage sieve
Protruding mass of reeking bile
Which forms infected booger pile
Assemble now the tablet
Hope that it's not Braille
Bring forth now the Master
So we can end this tale
And we'll kill everything (x3)
Especially ourselves
Transmogrify your plasmic swarm

Evaporate before time's storm
And dedicate your life to porn
And dedicate your life to porn
You think that life has a reason?
You think your god has a soul?
I bare my bum to the heavens
I think a head is a hole.
And we'll kill everything (x3)
Including ourselves
