

Iron Man

"Black Night"

Visit "[Black Night](#)" on MotoLyrics.com

My brain is tortured all day long
The phone, the screen, more unknowns
The boss is lost in senseless time
He says my worth
Is measured in kind

Job is over, its time to run
Find that bud and have some fun
Im lost in endless time
To save myself or live a lie

Black night, black night,
Black night

She walked up to my door
Knocked on the window
And asked for more
The drugs really turned her on
But the AIDS tore me down

She tried to trade her best gift
I tried to fight but fell into the pit
Now Im trapped within my mind
To help myself or go and die

Black night, black night,
Black night

Late at night more chaos comes
Im just too stupid and I wont run
Now my friends, try to hail
While I sit in hell and rot in jail
