The beginning of the day starts so early  
They're getting prepared for the journey  
All systems are go for the take-off

The engines roar into the skies  
They soar - Fighting for freedom  
They're fighting for the cause  
Across the sea, over another land  
Victory guaranteed, united they stand

Bombs are exploding, down below  
People are running everywhere  
The mission successful, they move on

Back across the sea, they return  
Flying in formation, they are proud  
Freedom is preserved for another day

Freedom fighters fly high in the sky  
Gliding on the wind, they're traveling  
At great speed - waiting for the call  
They're ready to serve  
Where freedom fighters go  
The opponent will fall
