Living in a wasteland, it's all in his mind  
Taking care of business is what he's gonna do  
Looking to the future, only time will tell  
Recognize extinction, then we might exist

He is a survivor, in his own mind  
He will surmise  
Taking great pride in staying alive, strong focus on  
Life leaves death behind

They're beating down your back door, its what  
You can expect, ya gotta take cover if youre  
To survive  
Your back on the run, get yourself a gun  
It's a tricky situation, time to take control

Living in a wasteland, it's all in his mind  
Taking care of business is what he's gonna do  
Your back on the run, get yourself a gun  
It's a tricky situation, time to take control
