

## **Iron Mask "Alien Pharaoh"**

Visit "[Alien Pharaoh](#)" on MotoLyrics.com

Spaceships, galactic hordes of war  
Reaching for the light of a brave new sun  
Alien nation in the sky, unknown dimension,  
Mysterious twilight  
In the night they spy on the world we live  
In their eyes, the thirst of victory  
Will we die, do they bring war or peace?  
End of time, my visions will fulfill  
Alien, alien pharaoh  
Coming from beyond the stars  
They don't need to talk, we know their thoughts  
Manipulating our brain and mind  
No fear in their heart, no more hope  
Annihilation is their final goal  
Human cries, innocence of the child  
Pray your gods, now we will have to fight  
Aliens rise, we will defend our blood  
Black or white, understand we are all the same  
Alien, alien pharaoh  
Coming from (far) beyond the stars
