Garden of the Gods  
Â©2000 Catsongs Productions

Steal the sun right out of the sky  
No need to ever ask why  
Breathe the shadows  
And sense the thunder  
No need to keep it asunder  
Graven images feed my mind  
Wake up to another time  
The air is cool and the air is free  
You'll never ever see me

Covet the night - something  
Here's not quite right  
Covet the night - never  
See the bright sunlight  
Covet the night - Grab  
The world by the cover of night  
Covet the night

Time to go, time to run

Somebody's let out the sun  
Fallen angels race for the night  
Blinded by the laser light  
So we pray for the setting sun  
Breathe easier when the day is done  
Crimes of passion in your ear  
Dead silence is what you fear

As we wander through the night  
There are few signs of life  
Creatures like us band together  
Going from here to never  
The moon wanes overhead  
Questions asked but nothings said  
You've seen the demons of the light  
That's why it's forever night
