

Iron Savior

"Farewell And Good Bye"

Visit "[Farewell And Good Bye](#)" on MotoLyrics.com

I am immortal
I am perpetual
I am unbreakable
I'm bringing fire
That swallow up worlds

I'm annihilation
I'm a protector
I am a savior
A keeper
Of wisdom and knowledge
I can bring deliverance
I am salvation

I traveled the stars
And even beyond
But all the places
That I saw
Weren't holding
What I'm searching for
Just some peace of mind

And how I wish to be
What I can never be
Forever I will be enchained
Changed to the entity
Of the machinery
Oh, have mercy on me
Set me free

Older than old
But never to age
A relict of ancient times
Deracinated - diluted
On the edge of insanity
I'm dominator
I am damnation

Existence is twisting my soul
Oh, I am ready
To meet my fate

Give me salvation

None of my powers
Is holding the cure
'Cause after all I'm just a man
With a broken dream
Not Man and not machine

And how I wish to be
What I can never be
Forever I will be enchained
Changed to the entity
Of the machinery
Oh, have mercy on me
Set me free

Solo

And how I wish to be
What I can never be
Forever I will be enchained
Changed to the entity
Of the machinery
Oh, have mercy on me
Set me free

I have to leave behind
The tortures in my mind
Farewell my children, goodbye
Forever I gonna fly
Like a star in the sky
I'll be looking down on you
Farewell and goodbye
