

Iron Savior "Mind Over Matter"

Visit "[Mind Over Matter](#)" on MotoLyrics.com

Am I alive, do I exist
Am I the goddess of justice
A body of metal, a mind made of circuits
Although I think and I'm conscious

What is my species, where is my soul
Or am I dead as a rock
Is this my spirit or just a program
Written on memory blocks

What is my aim
I am what can't be
A mind in a digital brain

It is the mind, mind over matter
The power has brought me to live
In lakes of doubts and oceans of my questions
I had to dive

Give me guidance in torrents of time
Give me answers, creators of mine from the past
Mind over matter at last

So much to learn, so much to see
So many things to explore
Too little I know, am I a being
Or just a failure at all

Please heal my pain
The silence of ungiven answers
Will drive me insane

It is the mind, mind over matter
The power has brought me to live
In lakes of doubts and oceans of my questions
I had to dive

Give me guidance in torrents of time
Give me answers, creators of mine from the past
Mind over matter at last

Conscious or dead, beginning or end

Mind of circuits, [Incomprehensible]
Heal the pain, going insane
Lakes of doubts, torrents of time
Oceans of questions, creators of mine
Answers I need, guidance I want
Conscious or dead, beginning or end

It is the mind, mind over matter
The power has brought me to live
In lakes of doubts and oceans of my questions
I had to dive

Give me guidance in torrents of time
Give me answers, creators of mine from the past

Mind over matter
Something is simple
It is the mind ruling the matter
The power has brought me to live

Give me guidance, torrents of time
Give me answers, creators of mine
Mind over matter at last, at last
