Down in the black hole  
Where time's standing still  
Something is lurking  
And longing to kill  
At the edge of the universe  
A forgotten beast  
Got released

Ten thousand demons  
Arising from hell  
Walking the earth  
To the sound of the knell  
Ancient evil is marching on  
And the end of days is to come

Unthinkable - invincible  
A power beyond believe  
No escape and nowhere to run  
The reaper is calling for everyone

And nothing but silence will remain  
Will I ever see you again

Take my hand  
For a moment in time  
And for all eternity  
I'll remember it by  
Give me a final kiss  
Time to say goodbye - time for goodbye  
I'm ready to go  
The evil must die

Tenthousand heroes  
Embarking to hell  
Holding the ground  
Defending the realm  
At the edge of the universe  
They'll boldly stand til the end

Unthinkable - invincible  
A creature beyond believe

I will fight for our love to survive  
The reaper must wait til another life

And from the ashes of the storm  
Our love will be reborn

Take my hand  
For a moment in time  
And for all eternity  
I'll remember it by  
Give me a final kiss  
Time to say goodbye - time for goodbye  
I'm ready to go  
The evil must die

[Solo]

I will return  
From the other end of the universe  
To save and protect you  
To keep you from harm  
To hold you  
Hold you tight in my arms

Take my hand  
For a moment in time  
And for all eternity  
I'll remember it by  
Give me a final kiss  
Time to say goodbye - time for goodbye  
I'm ready to go  
The evil must die
