

Iron Savior "Unchained"

Visit "[Unchained](#)" on MotoLyrics.com

A new day is born
In peace and in silence
Rays of the sun
Rip through the clouds
A new age is to come

The darkness decays
The heavens are shining
Golden and blue
Enlightening the dawn
A new world will move on

So many lives out in the fields
Oh, so many have died
Now we will rise
The chains you have held us are broken
And now we are

Free from the tyrant
The conqueror's been banished
Free and united
The throne in the sky now is free

Free from the tyrant
Relentless we fought to be free
Free and united
We have outlasted the war
The shadows of war

They came from the stars
To search a forgotten land
Rescue they brought
With thunder they fought
The tide has turned as they appeared

So many tears
Oh, we will always remember the years
Earth has been burned
But then they returned
To save us and now we are

Free from the tyrant

The conqueror's been banished
Free and united
The throne in the sky now is free

Free from the tyrant
Relentless we fought to be free
Free and united
We have outlasted the war
The shadows of war

No more we'll fight
Return to the light
The conqueror's been banished
The savior has vanished

The mighty machine
A million life's dream
Outlasted the past
Out in the vast

So many lives out in the fields
Oh, so many have died
Now we will rise
The chains you have held us are broken
And now we are

Free from the tyrant
The throne in the sky now is
Free and united
Relentless we fought to be
Free and united

After the war
The world is unchained
Free from the tyrant
Freedom we've gained

The Savior's been banished
The fortress has vanished
In peace and in silence
The world will move on
Darkness and war

No more we'll fight
We have returned
Returned to the light
To the light
