Voices crying for help, voices of time  
They will remain in pain  
We see a sign, a sign in the sky  
It shines so bright, please guide us in time

In a timemachine we travel on and on and on  
Through a gate of dimensions we ride

Always in time for the battle beyond  
Fighting with pride with the Gods on our side  
Silent we rise and we're breaking the chains  
Today is the day, we're gonna show you the way

In time we ride we'll be there for you  
We never give in we're heading for the past  
We see a sun, a sun in the past  
It's time for our fight feels like there is no end

In a timemachine we travel on and on and on  
Through a gate of dimensions we ride

Always in time for the battle beyond  
Fighting with pride with the Gods on our side  
Silent we rise and we're breaking the chains  
Today is the day, we're gonna show you the way

On and on through the gates made of time  
Echoes from voices caught and left behind  
Feel the rush as we fly together  
We're leaving our world with the speed of light  
Whispering words the secret of time is finally revealed

In a timemachine we travel on and on and on  
Through a gate of dimensions we ride

Always in time for the battle beyond  
Fighting with pride with the Gods on our side  
Silent we rise and we're breaking the chains  
Today is the day, we're gonna show you the way
