

## Isidore "Musidora"

Visit "[Musidora](#)" on [MotoLyrics.com](https://MotoLyrics.com)

We've been searching  
Out in places never seen  
Yeah, we've been looking  
Looking like a change of scene

My little special total extravaganza  
Like a summer night or Austin Lancer  
And when she rides  
I know I'll never make it alone again

We've been drifting  
Thousand miles over our heads  
We were drowning  
Down in river mouths and beds

My little special, my little creature  
She's so far gone, how can I reach her?  
And then she flies  
I know I'll never get her alone again

Baby star  
A tiny light  
Translucent beam  
So pure and white

My little special in all her splendor  
Like an avalanche or pawn shop Fender  
And when she plays  
I know I'll never send her alone again

My little special, the faith that's in ya  
You lived your childhood down in Virginia  
And when she hides  
I know I'll never find her alone again  
Never alone again, never alone again now
