"Hello" was all we said  
Now I can't get you out of my head  
Something in your smile I guess  
Left my heart so breathless  
My eyes just couldn't help but sigh  
This heart of mine can no longer deny  
It's such a special feeling  
I know that love is waiting 'round the bend  
Refrain:  
I'm so close to being close to you  
It only takes a while or two  
For love to smile at me and you  
For all we know this love may grow  
It all seemed like a dream

Can't believe this is happening  
Now you're here so close to me  
Something I thought could never be  
And I know I'm into something good  
I'll try to make it last if I could  
Got to get a little closer  
I'm so close to getting to know you better  
Repeat Refrain 2x  
I'm so close to being close to you  
I'm so close to being?  
Close to you
