I miss my wife  
I miss my best friend  
Every night

I miss my home  
I miss my own bed  
And my old life

Ooh x4

I lost my love  
It brought me so low  
As described above

I lose desire  
Into my mood swings  
Into the fire

Ooh x4

I can feel my face  
I can feel my face  
I don't want to know where the feeling goes to some  
better place  
I can feel my face  
I can't feel my face  
I don't want to know where the feeling goes to some  
better place  
I don't want to know where the feeling goes to some  
better place

Ooh x4

I miss my wife  
I miss my best friend  
Every night

I miss my home  
I miss my own bed  
And my old life
