[Intro]

I said no

I said no

[Verse 1]

I look at my life and I try to see

It shouldn't be what's on the T.V.

People killing people makes no sense

We all are living in our own defense

Sons are dying and mothers are crying

The worst part is that nobody's trying

If I can catch your ear and you promise to hear

Then maybe we can live for one more year

[Chorus]

So stand up and don't be shy

Make a voice and always ask why

We're turning into nothing as we speak

The sad thing is people think we're at our peak

[Verse 2]

I look at your life and it's easy to see

You're stripped from all your morals 'cause it's so easy

It's easy just to be part of the crowd

When everyone is silent, no one shouts out loud

[Chorus]

[Interlude]

I said no

We're turning into nothing as we speak

Just save me, I'm so weak

Don't you realize that you are next

We all are failing this test

[Chorus]
