Hot summer day (Hot summer day)
Carry me along
Oh, hot summer day (Hot summer day)
Please carry me along
Hot summer day
Carry me along
To its end
Where I begin

Long summer dream (Long summer dream)
Sliding round my mind
Those long summer dreams (Long summer dream)
Are leaving me behind
Hot summer day
Carry me along
To its end
Where I begin

Circling like a river
Over brightly colored stones
Breaking up my soul
And taking part of me home
Leaving the other half
To tumble all alone
Love, love, where did you go?

Hot summer day (Hot summer day)
Carry me along
To its end where I begin
Those long summer dreams (Long summer dream)
Still spinning round my mind
And they end where they begin

And I want to grab that river
And stop the love that's dying
Because I know that somewhere
Deep inside my soul you're still lying
Waiting to awaken
And shake that river's flow
Love, love, where did you go?

They told me that the sun turned green

I said I didn't know
And they told me that the moon turned blue
I said it didn't show
And they told me that I looked a fool
And I said I'd let that go
But when they told me that our love was dead
I had to turn and go

Oh love
Love
Love
Love
Love
Where did you go?

Hot summer day (Hot summer day)
Carry me along
To its end
Where I begin
Long summer dreams (Long summer dream)
Sliding round my mind
And they end
Where they begin

Circling like a river
Over brightly colored stones
Breaking up my soul
And taking part of me home
Leaving the other half
To tumble all alone
Love, love, where did you go?
