I made up my mind
There was this beautiful girl
I open my eyes
And see her passing by

[Chorus]
Please tell me where are you now
I have to find you
Please just show me how
We could climb the highest sight
Together till' we die (together till' we die)

[Verse 2]
I'm on my way back home
The sky is clear
Filled with stars
A shadow of you
Disappears in the light
You cross my way
And now you're out of reach

[Chorus (softly)]
Please tell me where are you now
I have to find you
Please just show me how
We could climb the highest sight
Together till' we die (together till' we die)

[Chorus]
Please tell me where are you now
I have to find you
Please just show me how
We could climb the highest sight
Together till' we die (together till' we die)
