"Here And Now"

Visit "[Here And Now](#)" on MotoLyrics.com

Lets get out of here right now
California is waiting for us right now
Don't look back cos all that matters is here and now
can't stay here
We can't stay here Santa Monica is calling us, lets just
drive and don't look back cos all that matters is here
and now, here and now, here and now
If we don't leave we may never get out of here right
now, lets just drive and don't look back cos all that
matters is here and now

Lets get out of here right now
California is waiting for us right now
Don't look back cos all that matters is here and now
can't stay here
We can't stay here the sun is setting on Bel Air and we
need to be there, lets just drive and don't look back cos
all that matters is here and now, here and now, here
and now
If we don't leave we may never get out of here right
now, lets just drive and don't look back cos all that
matters is here and now and your the only one I want to
be with so don't look back cos all that matters is here
and now
