(Verse 1) Yo Today's just another one of those days, I  
Had to admit it's not easy being J-Live My bust this now,  
the topic to discuss is It's even harder sometimes just  
being justice J-Live's just known to spin a record, spit a  
verse Just as Allah's just God of the universe Which  
means it's civilized, righteous original man With  
knowledge of self and wisdom you can understand  
Nothing less, nothing more, nothing holy, nothing pure  
Nothing gassed, just steadfast and sure When  
something comes up, something goes wrong,  
something gets done If there's not a way my will will  
make one My plans are planets grown and made from  
the beginning But now my game plan's going into extra  
innings But if it's a game, that means somebody's  
winnin' And if it ain't me? Nah, see, it's gotta be In this  
game of life, you score with every breath The idea's to  
retire on your own terms Never undefeated, just with a  
winning record So when it's there after you're gone,  
you're still respected But now I gotta fall back, it's a  
transition It's not a impossible mission, but man listen I  
can't say I'm not struggling Swingin' 9 planets at the  
same time feels like juggling Don't get me wrong, and  
don't get it twisted I wasn't drafted into this life, I  
enlisted Family, business, music, it sweetens the pot  
But what I need to know is... (Chorus) What do you do  
when you got 20 2 minute tasks and 10 minutes to deal  
with it? (Ah man, forget it) What do you do when you  
got 20 2 minute tasks and 10 minutes to deal with it?  
(Shouldn'ta bullshitted) What do you do when you got  
20 2 minute tasks and 10 minutes to deal with it? (Stay  
committed) What do you do when you got 20 2 minute  
tasks and 10 minutes to deal with it? (Just deal widit...)  
Just deal with it (repeated and scratched) (Verse 2)  
Sunset, sunrise, son time flies But is it a fly ride or a fly  
by? Most of my moves are long term, I must say I'm not  
fly by night, I'm here to stay I want a fly lifestyle with  
some fly things But I won't to the sun with wax wings  
You'll catch more flies with honey than vinegar But you  
better be prepared for the bee stings Whether you're  
beehive climbin is 9-to-5'in Or rhymin', it's all about  
timin' Time kills and it don't stand still Those times

where you just can't tell? Well, time will That's why I got  
no time to chill I run late when I save things for later I  
deal with it, ill with it in the last minute It's like I'm some  
professional -crastinator! But I still can't let time  
swallow me Truth is, if I master equality It'll all add up  
in the end But I can't pretend these bad decisions don't  
follow me Sunrise, sunset, sun gets your shit done  
Deadlines take all the fun from... Things that shouldn't  
even feel like work Now work your nerves cause time  
waits for no one! So it's time that I own up to it From  
time I wasted to time's up, I run to it It's not supposed  
to be easy bein' me But I shouldn't make it harder on  
myself when I gotta do it! So I'm hard on myself so I  
can go from sayin' 'I'm used to it' to sayin' 'I used to do  
it' But today as I'm goin' through it There's only one  
thing left to say... (Chorus) Just deal with it (repeated  
and scratched)
