El odio no me acosa
El dinero no me atrae
Si piedro todo, no me importa
Solo tengo un camino, la libertad

It seems like I got no voice, can you hear me?
Listen to me
It seems like I can't be heard, are you with me?
Listen to me

Never step back, never look back
It's your decision
Look at your life, are you still alive?
It's revolution

Never give up, never give in
I'm never gonna give it up again

I see in your eyes: you all wanna rise
You ought to better
Forget the lies, throw off all disguise
Do you remember

You are the boys who started the noise
I wanna hear you!
Never resign, don't say you don't mind
It's all up to you

Can't stop, all we want is our tomorrow
This time, the only thing you gotta do is to follow
And our dream will be real

I hate what I see but I gotta see
The fake smile of a king for a day
I'm sorry to say but I don't wanna play this game

A fight for the fame, it's gone too far
We're the sound from the underground
That's who we are
