[J-Zone]

Mr. President congratulations on inauguration  
Im here with advice to run a nation  
To satisfy the rich and be up for re-election  
So i advise you follow my suggestions  
"I dont even know you nor the nation that you come  
from"  
"Now you wanna give me advice on how to run one"  
"I should call security" My bad I'll introduce to ya  
The clan grand wizard and my name is Lucifer  
But you could call me Satan "Yo to barge in here is  
rude of you"  
Sorry but america seems kinda peculiar  
"I face the press in 5 minutes make this shit quick"  
America is broke and I know just how to fix it  
"Got any suggestions?" Yo slavery was brilliant trust  
me  
They need to bring it back cuz black bastards disgust  
me  
I second that emotion for their Puerto Rican cousins too  
They even have leaders what the fucks the world comin  
too  
Minority vultures sabotage American good will  
I wish for target practice they stood still  
To make the world a better place we gotta take action  
"So where do I start" You gotta make things happen  
Like overpopulation but thats kinda complex  
Cuz niggas and spics always fiend to have sex  
Those free clinic goin ghetto dwellin nymphos  
I know we could put something in the indo  
Shit to make em impotent while they're screamin  
represent  
In another 5 years they'll be askin where the niggas  
went?  
Drinkin malt liquor fuckin up their livers  
But we laced them with carcinogens so everything is  
cool  
Also, watch the borders those Mexicans is leakin in  
But thats ok they go to L.A. and get they fuckin heads  
beaten in  
"More cops perhaps" ã,

Fuck yeah who's gonna shoot those little monkeys in  
their backs  
"So what's up with education" Just cut financial aid  
Stop givin money to schools with bad grades  
They'll all go back to the slums cuz their school money  
fell through  
Governor Pataki can help you  
And as for schools in the city let me set this straight  
Just remove that asbestos late give the rich schools  
computers  
"Textbooks are gone with the wind" ã,  
Great now bar up the windows so they feel like inmates  
"Ooh but the housing dilemma thats a tuffy"  
Dont say that "Why" ã, We know where all the niggas  
stay at  
We got enough projects, if we dont build more  
Its great when niggas visit other projects and get killed  
for it  
His mother screams "My baby" and prays in church  
Coons are gullable that preachers gettin paid to work  
It's easier for us too we know where they're stayin  
Shit their whole fuckin exsistance is a 4 block radius  
"So what about violence" Let the red kill the blue  
East coast West coast beef helps too  
Black folks will kill their brother for no more than a shoe  
So when they go extinct cant nobody blame you  
"But people are hungry theres no food"  
Shh that aint hard to do cuz you know and I know  
niggas love to barbecue  
Just give em pork and let em suck the bone dry  
"Cholesterol and hyper tension" No shit I wonder why  
Overweight havin heart attacks at twenty eight  
Great now give em that free cheese issued out of state  
It lasts for a decade so blacks are fuckin thrilled  
The preservatives we used left the lab rats killed  
"Damn this sounds grim at least for those with  
melanin"  
"Minorities are headed for the dumps" To hell with  
them  
"Two minutes and countin before I face the nation"  
A few more details relax stop pacin'  
Minority extinction the way it's gotta go  
Just a few more little things to let you know  
You gotta close off the ghetto with the Coast Guard  
"Damn Why" So when those animals riot nobody but  
them dies  
They burn their own stores down ha ha fuckin savages  
"Damn can't we give them just a little bit of happiness"  
Fine give em Cristal name brand clothes  
Iced down jewelry fly cars and hoes  
Let those bitches think they're rich poppin' Mo' in rap

videos  
My daughter's learning Windows 98 in 20 years she'll  
be straight  
While she's workin on a job with computers  
Tomorrow's black leaders on the corner smokin  
buddah  
Give them all Lexus's but no health insurance  
"Cool" And take that ESL out the schools  
Crack was made for them so make sure they smoke it  
all  
Prescribed by Uncle Sam until the drug problem dies  
But you can't make it obvious listen to jazz and rap,tap  
dance  
And they'll believe that you care about em "Fat chance"  
"I'll take it in consideration" For  
a...kinder...gentler...nation

(echoes out)
