(feat. Eric Clapton)

Danger is out into the night
Danger she's such a pretty sight
She was treated so badly it seems, now she's looking
for a dream
Danger is out into the night

Danger she walks the streets alone
Danger all the bars she has to know
All the men that look her way could be hers hers today
Danger is out into the night

Locked into a love affair didn't seem to go nowhere
With no choice she thought she might
Caution to the wind, right into the night

Danger she walks the streets alone
Danger all the bars she and I know
All the men that look her way could be hers today

Will she take to find someone new
She goes nowhere I've been
She wants to do too many guys
Shes gone out to the night

Danger shes out into the night
Danger she's such a pretty sight

Danger she's out into the night
Danger she's such a pretty sight
Danger she's out with you tonight
Danger she such a pretty sight
