I can see it now  
My life was breaking down  
A lost and so ungrateful and unfaithful soul  
Hurt so many friends and now the pain won't end  
And I'm so glad that grace and favor wins

I've made You grieve and made You weep  
Woe is me I've strayed from Thee  
Restore me back to that place oh God  
Let me rest in You  
There's nobody like You  
I found out

People will leave you out to die  
And not even care that they made you cry  
And the more you try, to make it right  
It seems like nothing happens  
(I found out)  
Friends will leave you out to dry  
Whom told you they'd never leave your side  
But you will find, in the nick of time  
It works out because  
God happens

Underneath your wings  
I can now see my dreams  
Your word is my will, sword and shield  
Look at me  
One with Thee  
Finally you're smiling at me  
Restored back to that place in You oh God  
There's nobody like You  
I found out

People will leave you out to die  
And not even care that they made you cry  
And the more you try, to make it right  
It seems like nothing happens  
(I found out)  
Friends will leave you out to dry  
Whom told you they'd never leave your side

But you will find, in the nick of time  
It works out because  
God happens

I found out

People will leave you out to die  
And not even care that they made you cry  
And the more you try, to make it right  
It seems like nothing happens  
(I found out)  
Friends will leave you out to dry  
Whom told you they'd never leave your side  
But you will find, in the nick of time  
It works out because  
God happens

God Happens [x3]  
Yes it does  
[Repeat until the end]
