(Baby take me high, me high, me high Baby take me high, me high)

Girl you take me to another space in time  
Got me on rewind in my mind I know,  
Everytime I look at you  
I pause for a second  
Record every moment  
So I can love you  
That's all I wanna do (baby)  
So I can show you  
How high you really take me

Cause every time your not around  
All I see is you  
All I breathe is you  
You pull me up, up, up, up

She takes me higher,  
Higher than I've ever been before,  
More, more than I've had but so much more,  
Said I'm so high,  
Yes I'm so high  
Baby I'm so high

(Baby take me high, me high, me high)

Someone like you is hard enough to find,  
And it gets me every single time  
And all she wants to do is make it right  
It's time to spread your wings  
Your about to take flight

As we cruise across the night sky  
Watching stars and planets they pass by  
You know you shine brighter than the sun  
The galaxy is waiting for me  
Baby we here come

She takes me higher  
Higher than I've ever been before  
More, more than I've had but so much more

Said I'm so high  
Yes I'm so high  
Baby I'm so high

She takes me higher  
Higher than I've ever been before  
More, more than I've had but so much more  
Said I'm so high  
Yes I'm so high  
Baby I'm so high

And it feels like we're falling  
That's when gravity comes calling  
I think I've forgotten just how land  
But I don't gotta worry  
Yeah she take me by the hand (take him by the hand)

And it feels like we're falling  
That's when gravity comes calling  
Ohhh, you give we wings to move up  
When I'm high, high off your love (oh)

She takes me higher  
Higher than I've ever been before  
More, more than I've had but so much more  
Said I'm so high  
Yes I'm so high  
Yes I'm so high

She takes me higher  
Higher than I've ever been before  
More, more than I've had but so much more (baby)  
Said I'm so high  
Yes I'm so high  
Baby I'm so high

(Ohh, baby take me high, me high, me high ohh baby  
take me high, me high)
