"What Locks The Door"

Visit "[What Locks The Door](#)" on MotoLyrics.com

What locks the door to the world you're living in
What kind of key do I need to get in
I've tried everything from solid gold to cent
What locks the door to the world you're living in

You can't relive the past with a dream that's gone
You can't find love that will last in your world alone
A Hurt so tall has built a wall
Where fate begins
What locks the door to the world you're living in

Chorus:

Some how some day I'll find a way to warm your heart
and take away this pain that's keeping us apart
I need you now but even more I'll need you then
What locks the door to the world you're living in

Chorus:
