don't give your love away
wait for me, i will come to you
and we'll have a thousand days of may
don't give your love away

i kiss your smiles away
i know waiting will be hard for you
but i wish i could do more than say
don't give your love away

(refrain)
our longest day
will be when i remember today
and i wonder if you'll be there
if the years haven't touch our love affair

still moments speaks for me
tell her words are much to weak for me
still i wish i could do more than say
don't give your love away

(repeat refrain)

still moments speaks for me
tell her words are much to weak for me
still i wish i could do more than say
don't give your love away....
