When you wake up in the morning
do you think about me

When you wake up in the morning
do you think about me

Girl you know your on my mind all the time,
i can't see..

Sittin' here thinkin about when you was with me

i know i should've done you better girl it's all on me
i know i should've done you better girl it's all on me

Now im callin up your mamma askin why you wanna
leave..
when deep down inside i know that it was me..

You.. play in my head like the radio,
when you were mine i just let you go
and i knew that you're the one for me
it took awhile for me to see that..

So hard to change, what time has erased
i can't let it go, i can't let it go
And even though it can't stay the same
i think of what could been, girl i knew..
and girl i knew..

That i want my future back, back, back, back, back
That i want my future back, back, back, back, back
back, back, back, back
(lyrics by: illestbrian)

i can't lie in the past i was on my own shit,
i can't lie in the past i was on my own shit,

in the studio i left you all alone..
baby girl i was so wrong
if i could take the past and throw it all away
then i know you would be right here today
it's such a shame OoOouu

You.. play in my head like the radio,
when you were mine i just let you go
and i knew that you're the one for me
it took awhile for me to see that..

So hard to change, what time has erased
i can't let it go, i can't let it go
And even though it can't stay the same
i think of what could been, girl i knew..
and girl i knew..
That i want my future back, back, back, back, back
That i want my future back, back, back, back, back
back

That i want my future..
All i see is your face, babe.. Oh i..
Someone is taken my place, babe.. Oh i..
This just can't be real.. baby i need you back.

So hard to change, what time has erased
i can't let it go, i can't let it go
And even though it can't stay the same
i think of what could been, girl i knew..
and girl i knew..
That i want my future back, back, back, back, back
That i want my future back, back, back, back, back
back
that i want my future back..
