How the web was woven
Through my soul
How the web was woven
I can't get through
I can't let go
Like the weave of a spider
Wound around my heart
Im no longer free
At last Im where you want me
Don't you know that's where, that's where I want to be
Spinning round like a blue fly
Thoughts of you fill my head
And no matter how I try
I can't sleep
In my bed
Ive been round for the last time
Oh girl
What can I do?
That's how the web was woven
How I fell in love with you
Ive been round for the last time
Oh girl
What can I do?
That's how the web was woven
How I fell in love, fell in love with you
That's how the web was woven
How I fell in love with you
How the web was woven
How I fell in love with you
