It's in the atmosphere we breathe, tonight.
It's in the people that we meet.
And in your eyes.
And just like every other fool out there.
We all think we're so unique.
Such special freaks.

(x2)
It's in every single one of us.
Every single one of us.
Looking for a single cause,
Hoping for a second shot.
Every single one of us.
Every single one of us.

I see the world like through a looking-glass.
I see the people walk right by, by, by.
Like paper tigers rolling in the street.
They stare right through me when we meet.

(x2)
It's in every single one of us.
Every single one of us.
Looking for a single cause,
Hoping for a second shot.
Every single one of us.
Every single one of us.

OHHH...

(x4)
It's in every single one of us.
Every single one of us.
Looking for a single cause,
Hoping for a second shot.
Every single one of us.
Every single one of us.
