Box on beauty, test-tube monster
Beautiful specimen and witchcraft woman
Problem child, a waste of time
With her ruby red lips and her evil ways

Planet on to her self she is a planet on to her self
Planet on to her self she is a planet on to her self

Body of a boy, mind of a monster
Filthy low brown stubborn
Nothing's real, but a sideshow freak
I hate her and I always will

Planet on to her self she is a planet on to her self
Planet on to her self she is a planet on to her self

And when she looked me in the eye and said "I want
your blood"
I stood as hypnotized, mesmerized, she blew my mind
She said "I want you to be mine and be just like I am
I will destroy you when you love me and I'll make you
blind"

But if you leave me little girl then I will kill you dead
And if you leave me I will have to take apart your head
