I could get used to this
Just pile everything up on me
In burying
Knee deep and rising, rising

From a ripple to a tidal wave
Three steps to an early grave
Turned the key and walked away

Three words I lied to you
Swear I tried for you
Message did not get thru
I couldn't reach you now so

Go, go far away from here
I'm bruised and healing
I'm burned skin peeling
I'm the pain you're feeling today

An empty pace, a deadlocked stare
Happy here knee deep in fear
Wish this room would disappear

Three words I lied to you
Swear I tried for you
Message did not get thru
I couldn't reach you now so

Go, go far away from here

I don't see you leaving
Don't see you walking out on me
You won't see me leaving
Won't see me losing everything
