Love is for weak, love aint for me  
the only thing she love is makin love in the sheets  
Love in the streets man she lovin the beat  
love all around me now im feelin the heat  
Some people want love just to have someone to lean on  
but i live above and the clouds is what i dream on  
im so high in the sky and got the sun burning beneath  
my feet  
Floating in thin air i can pull out a star and have it for a  
treat  
They always used to say if you have everything you  
have nothing at all  
So i pull out a hundred and said herre try givin franklin  
a call  
cuz i got no wife but a good life b\*\*\*\* Im Raw  
I dont need anyone i dont need anything  
If i wanted to i could just spit my game  
but i dont want to fall in love and i dont want to get held  
down  
cuz without this love i keep floatin around...in orbit, ha  
but id rather have no love than bloated love like Norbit  
They say the sun makes the earth shine bright  
but im the one that gives the earth its light  
and the day dont end till i say goodnight thats right

In the winter I can make the sun hot as hell  
and in the summer i can make everyone colld and pale  
see i dont need love because i can do all this  
take off that sweater cuz im changin it back to August  
The moon down come up when the sun go down  
the moon just followin me circlin around.. the earth  
but he know he cant catch me he's been tryin since  
birth  
Love dont last forever because all love dies and where  
love dies heartbreak arrives  
but you cant realy die until you live  
and some don't live unless they have love to give  
and if you have love to give you have love to get  
and if you die lovin you get all my respect  
Love is for weak, love aint for me  
the only thing she love is makin love in the sheets  
Love in the streets man she lovin the beat  
love all around me now im feelin the heat  
I hate you to love me but i love you to hate me  
and i know if you hatin its because you aint me  
Peace!!
