Since you been gone, I've been out to lunch spaced out  
or something and I know its my fault

Im think maybe Im just poison(oooo), cause the love I  
find it always dies away. Or maybe I'm some kind of  
alien(ooooo) sometimes she looks at me like Im from  
another place I guess that would explain it how I'm  
always out of place that explains it how she dont  
understand what I say, that explains it how I can tune it  
all away go to another place Im going out of space

Tonight Im leaving earth on my space ship space ship  
I'm taking off if she dont want to see me then I dont  
want to be here no more no more I'm going far away  
Tonight I'm leaving earth in my space ship space ship  
Im takin off she's the only one who knows me and now  
I'm just so lonely I'm alone I'm all alone I'm going far  
away tonight I'm leaving earth in my space ship yeah  
yeah tonight I'm leaving earth in my space ship yeah  
yeah

All I hear is noise and drama I see lips just moving and  
I'm blockin out the bruisein and the problems  
conversations we miss use it cause my baby's so used  
to it that I get caught up get caught up in what I'm tryin  
to say we used to be like music now we tone deaf and  
they boeing and I know that I never ment to push you  
away that why flying out to space. babyy

Tonight Im leaving earth on my space ship space ship

want to be here no more no more (No more baby)I'm
