"Just Human"

Visit "[Just Human](#)" on MotoLyrics.com

So much help we take for granted
Without giving back a dime
So many end up stranded
Pon social and menthal decline
To get what you want no matter what the price
Live and let die by throwing the dice

Is that human
That?s not human
Or is it just human
But that can't be everything

I don't know everything
But what I know for sure
Is I'm not perfect just like you
Days like these weeks like that bring you down and the
take you up
When the mood is good and the vibes are mellow
melody smooth
Wether black brown white or yellow everybody cool let
love rule

Chorus

What does it take to make somebody keep a secret
What does it take to make somebody keep a promise
Promises broken secrets outspoken
Basically it shouldn't be a problem but I have come of
age I've read that page but what is the rest of human
story
Basically it shouldn't be a problem but I have come of
age I've read that page but what is the rest of my story
