Your number one one one
Your number one on my roster
Oh baby don't you know you are (you are)

[Verse 1:]

The kind that doesn't mind to spend the time
And gets good love from me
And doesn't make demands and understands that I
need room to breathe
Her famous name and crazy ghetto love making she's
a freak
She's knows I like to switch it up
With different flavors of the week
But she hates it when she's on the bench
Cause she play to win

She wants the ring
She wants everything
She's the center of my team so I guard her heart
Let's just keep it moving forward and you'll always start

[Hook:]

You play your position well
And it aint hard to tell
That you're the number one on my roster
Winning player with a winning team
My lineup is mean but you're still the number one on my
roster

[Verse 2:]

The kind that likes to shop expensive things
Her style is so unique
She qualifies free agency but she chose to play for me
And I can trust her in the clutch
And all the time she's all I need
And no I never said this to you girl
You're my MVP
She hates it when she's on the bench
Cause she plays to win

She wants the ring

She wants everything
She's the center of my team so I guard her heart
Let's just keep it moving forward and you'll always start

[Hook:]

You play your position well
And it aint hard to tell
That you're the number one on my roster
Winning player with a winning team
My lineup is mean but you're still the number one on my roster

[Bridge:]

The game's been good to me
She's my lucky number 23
And I think it might be time to retire your jersey
No more team second string
It's time for some one on one
It's safe to say my player days are done

[Hook:]

You play your position well
And it aint hard to tell
That you're the number one on my roster
Winning player with a winning team
My lineup is mean but you're still the number one on my roster
