Deep in the cold midwestern snow way back in 1899  
A wicked evil seemed to grow  
It's taking over people's mind  
Come here my child let me inside  
No get away my head!  
I have a mission for you and your friends  
Help make the towns people dead  
Madness is taking them over tonight  
Madness will soon take its hold  
Madness is taking them over tonight  
Evil it lives in the cold  
Little children it's in their minds  
Little children lurk in the night  
Little children why won't they die?  
Little children lightning the fire!  
Back in black river falls  
Back in black river falls  
Miss Watson gave birth to a child  
Before it took its final breath  
Her guilty conscience drove her wild  
And so she choked her son to death  
Infant disease flew on the breeze  
Madness enveloped the town  
Men went insane deeds so profane  
Buildings were burnt to the ground

[Pre-chorus]

Little children it's in their yes  
Little children gather tonight  
Little children wicked children  
Deadly children post

[Chorus]

Father can you hear me?  
I've been taken by something I can't explain  
The voices in the darkness  
Have told us to punish you all!  
Father you should fear me  
My mind it is possessed by an evil entity

This shameful place is forsaken  
Poisoned by the sickness in all of you  
We are coming tonight  
Rising from their beds eyes were glowing red  
One by one they cut the people down  
Chaos filled the streets  
Blood was running deep  
Nothing was left living in the town

[Lead Garcia]

The morning sun shined on the scene  
Such horror that cannot be said  
The children wiped the village  
Clean all of their parents lie there dead!

[Pre-chorus]

[Chorus]
