"Circles"

Visit "[Circles](#)" on MotoLyrics.com

There was a second where
To be somewhere, was not right there
I take a breath, then close my eyes
To recognize your smile, your lips
Your eyes, your hair
Everywhere I stare
I couldn't be more amazing
Than being right here

Let's pretend there is music
And no air to confuse it
I won't care, if anyone notices but me
I would fight, to get it right now
Take flight, propel me in the sky, I'm alright
Tonight...

If I can't stay
Take me away in a journey
Make it last forever
And if I drift away
I'll come back to you in circles
And make it last forever

I would love to be with you
Through and through
Fulfill my dreams
Only you would know just what it means
Your style, your looks, your attitude
Don't know what I could do
Without you in my heart
You in my mind
We've got to find a way

So let's pretend there is music
And no air to confuse it
We won't care, if anyone notices but us, but us...
I would fight, to get it right now
Take flight, propel me in the sky, I'm alright
It's just right, yeah yeah

If I can't stay

Take me away in a journey
Make it last forever
And if I drift away
I'll come back to you in circles
And make it last forever

In our own little secret world
There are no rules to apply to
My feelings grow more and more and more...
In our own little space or time
We're on our own watch
And we've got to fly
Soar and soar and soar

If I can't stay
Take me away in a journey
Make it last forever
And if I drift away
I'll come back to you in circles
And make it last forever
I won't drift away...
I'll come back to you in circles
We could last forever...
