[Verse 1]

If I could replace everything you wanted to hear  
Well, I could not, and I'm sorry  
I just gave you all of me  
And I wonder if it's true... did I give it all to you  
From what I recall, I didn't give anything at all

[Pre-chorus]

Now you wonder why things  
Just don't get to happen your way  
Is it killing you bad, go figure  
You had one chance at love  
But you gambled it for attention  
Now I've come to mention  
Guess it's your predicament

[Chorus]

In the past, they couldn't say it would last but  
It's really ordinary, the situations scared me  
To be an outcast, I was an outcast  
I am an outcast, outcast... whoa

[Verse 2]

Never seemed to stick to  
Fundamental building blocks of the world  
It's so boring to me, there's more to believe  
I go in circles just satisfy myself  
So how do you think  
I would come and ask for your help

[Pre-chorus 2]

Now you see just why things just don't  
Get to happen your way  
Is that you being sad, well go figure  
You had to help me in  
But you decided all that's left is yourself  
And what I find out now, it's just me being proud

[Chorus]

In the past, they couldn't say it would last but  
It's really ordinary, the situations scared me

To be an outcast, I was an outcast  
I am an outcast, outcast... whoa

[B-sec]

I'll deal with it, we all can feel it now  
Now... we're getting closer every day  
I'll deal with it, we all can feel it now  
Now... we're getting closer every day  
Can you feel it now?...

[Chorus]

In the past, they couldn't say it would last but  
It's really ordinary, the situations scared me  
To be an outcast, I was an outcast  
I am an outcast, outcast... whoa  
To be an outcast, I was an outcast  
I am an outcast, outcast... whoa
