true

true jaimeson

true angel blue

true steve feelgood

true comin to u

bak once again still 10 outta 10

still makin a menz still jaimeson

as i enter the 3D base inventor

who says i never meant to do this

we've been thru this before

now i'm in control that way there's more

producing now introducing a lady called angel blue

and a track called true

i kno wot steve said but there's no regret in this

lets make arrangements for an appointment in my
head

be as that shallow as the situation be

momentary pleasure got me feelin oh so weak

side by side lay on ur back flat like domino

we can roll like dice trip like ice

melt i can make u fall up n down

like SNAKES AND LADDERS uh uh

tell all ur friends

tell all ur friends i had ya!

i'm feelin u so whats it gona be

i mean honestly tell me wot u need

can u be true or be that as it may

chase the clouds away each n everyday

just u and i just u and i its true

these emotions say it all but u still dont call

its slip n slide its all so we can do it all

could u handle it could u manage it

i want it all so make it unforgettable

side by side lay on ur back flat like domino

we can roll like dice, trip like ice

melt i can make u fall up and down
like SNAKES AND LADDERS uh uh
tell all ur friends
tell all ur friends i had ya

i'm feelin u so whats it gona be
i mean honestly tell me wot u need
can u be true or be that as it may
chase the clouds away each n everyday

i'm feelin u so whats it gona be
i mean honestly tell me wot u need
can u be true or be that as it may
chase the clouds away each n everyday

just u and i its true just u and i its true
just u and i just u and i its true

I check, check 1 check 2 hype it up inside the venue
allow me to bring u the big tunes
so excuse i just need some room to let go a new flow
let me explode just like nitro
back with a little of wot ur not used to
angel blue and j the producer

i'm feelin u so whats it gonna be
i mean honestly tell me wot u need
can u be true or be that as it may
chase the clouds away each n everyday

just u and i its true
