The twilight's here  
I'm still alone  
I used to love you  
But now I know  
For all you've done to me  
I know that you and I have inseparability  
I'm sitting here watching TV  
Watching a movie  
That reminds me of you and I  
So please tell me why...

Wonder why it's over  
Now I'm listening to the radio  
The song plays like "Oh this is where the magic  
happens without you"  
What am I supposed to do  
Hope nothing gets in your way...  
So baby there is nothing you can say to me  
I'm on the spotlight  
You can't take me away  
I can break you away  
I don't care but I'm not gonna regret it  
Just don't set it

I'm all alone at night  
Thinking about you  
Dream big 7x
