limousine driver
big cadillac car
rich and famous
no matter who you are you are
i seen a rock n roll rider
i seen a cinema star

chorus:
won't you roll down the road
roll down the road roll down the
roll down the road with me
want you to roll down the road
roll down the road roll down the
roll down the road with me

deep into the night
blue velvet push
cut glass crystal
i mean it means so much
long cool fingerroos
soft tenderloin touch

chorus

city sidewalk shining wet with rain
run through the run through one more again
run through the jungle
fetch a lady's glove
kicking off a bundle
go on and give it a shove
speak up don't mumble
who do you love
