I tried to call you but the line was busy
Were you talking to a friend?
And when I tried again much later
I didn't want to let it ring again

So you can see I got a problem
Back by popular demand
Sometimes I want to keep it from you
Sometimes I think you'd understand

Could you be my little movie star?
Could you be my long lost girl?
It's true that I don't really know you
I'm alone in the world

When I think maybe I need you
And I don't care if it's not true
It isn't so much what I need now
As what I really want from you

Could you be my little movie star?
Could you be my long lost girl?
It's true that I don't really know you
I'm alone in the world

It's true that I really don't need you [unverified]
I'm all alone in the world
