Alarms

Alarms you wear like someone would actually care
A warning sign to trouble my peace of mind
Just a lie these children don't actually cry

The sun will set and you will be alone
(I'll find my way)
The stars in the sky will always fall
(Without you I would stay)
But I'll find my way back home

Bittersweet
Trouble has hit the street
Comprehend the message they try to send

The sun will set and you will be alone
(I'll find my way)
The stars in the sky will always fall
(Without you I would stay)
But I'll find my way back home

When you look at your world
Dressed with jaded eyes
You see all your faults
Play you in disguise
So why should I see through to view
A world that's not for me

The sun will set and you will be alone
(I'll find my way)
The stars in the sky will always fall
(Without you I would stay)
But I'll find my way back home
