We feed the fire  
Burning down a private road  
We leave desire  
In every empty place we go

We can't believe that fate will find the way  
We can't deceive ourselves another day

For just one night  
We could be like birds in flight  
With a vision to lead us on  
And guide us to the light

For just one night  
We could free ourselves  
From all the ties that bind  
Just one night  
For just one night

We're on the wire  
Everything is not yet lost  
All we require  
Is a bridge to help us cross

We can't believe that fate will find the way  
We can't deceive ourselves another day

We allowed what should not be  
Tossed away so carelessly  
Took the plunge in waters deep  
We'll be stronger

There's a choice that we can make  
There's a path that we can take  
I know that it's not too late
