I programmed my abdomen
I don't think about it anymore
It doesn't tell me what to do
I got the network to my nerves now
It's oh so automatic
I just command the boat inside the house
You can't chew well because it feels like a foreign
object in your mouth
Well screw my brains
I screwed your
Go take a jump off a cliff
Yeah, just don't look down
Splat!
Way down there
You're laughing so loudly
You're sure a funny thing
You can take all your laughter
And scream at the night
I'll never go with you
I'm the one that's there
