"I Met You"

Visit "[I Met You](#)" on MotoLyrics.com

I got at least one more thing to say
I'll make you the first choice
And then we'll see what happens
I'm gonna give it all that it needs [3x]
It doesn't need water
It doesn't need any excess
I don't know if there's just the right amount
But I hope I can figure it out
And give you just the right amount so that you lose
yourself
And become a part of my reality
I got a world, I found you on the periphery
Somehow I pulled you in

Now that you're here, tell me
Is it the best place you ever know
Because I'm at the best place I ever knew
And it's just after I met you
