If life's little downs they keep coming around

Carry on, carry on

With darkness all about, you want to scream and shout

Carry on, carry on

Don't cry baby, look at where you've been

Everybody knows you just need a friend

Please, please, please, if you're down on your knees

Carry on, carry on

Your head is full of doubt, you can't figure it out

Carry on, carry on

Between the time it takes to make all those mistakes

Carry on, carry on

It don't matter what you say or do

It just seems to work out if you want it to

Let out all the slack, take it off your back

Carry on, carry on

Let me bend your ear, never shed a tear

Carry on, carry on

Carry on, carry on
