I'll always love you
Even though you are far away
I will think of you
While you ignore me

No matter how many times you say
That you're over me
I won't believe it
And no matter how loud you scream
I know you still want to kiss me

Chorus:
Our love goes deeper than the lies that were buried
Our love is clearer than the shadows of doubt
And I don't want to lose this once in a lifetime
Let love win please darling let love win!

I have no excuses for my terrible choices
My heart was in the right place
Will you ever forgive me?

Ahhhh (bridge)

You trusted me I trusted you
But now all of our dreams are fading
There's nothing else I can do
Except to pray that you'll come back

Chorus!
