Give me a reason --- Janet Gabriel

I was giving you all you were frontin'  
Saying that you don't need me then braggin'  
To your friends that we've got something going'  
Letting them know that you're in control  
Then I found out just what you were doin'  
And now I know the way that you're thinkin'  
Now it's time that I asked you a question  
What would you choose, my love or your pride

Take your time, think it thru' till the truth  
And you can decide what you want to do  
Pick your words carefully make no mistake  
Choose or lose now before it's too late!

Chorus,

You've gotta give me a reason  
For me to hang around  
When all you do is hurt me  
And try to bring me down

You've gotta give me a reason  
For me to stay with you  
When this love's not workin'  
And you can't see it thru'

All I want is a little respectin'  
And I don't think that's too much expectin'  
Did you think you could hurt me for nothin'  
Figure it out or you will miss out  
Are you strong as to make a decision  
Now that you understand my position

Make it right now or don't u know how

Do you think you can walk over me?  
I'm better than that  
You just don't see  
Give me a reason why I shouldn't leave  
Prove to me now make me believe

Chorus

You've gotta give ne a reason  
For me to hang around  
When all you do is hurt me  
And try to bring me down

You've gotta give me a reason  
For me to stay with you  
When this love's not workin'  
And you can't see it thru'

Spoken: It's not right...

You want me to hang around  
And let you bring me down  
Want me to stay with you  
When you can see this thru'  
You want me to hang around  
And let you bring me down

No no no no

You want me to hang around  
And let you bring me down  
Want me to stay with you  
When you can see this thru'  
You want me to hang around  
And let you bring me down

Chorus

You've gotta give ne a reason  
For me to hang around  
When all you do is hurt me  
And try to bring me down

You've gotta give me a reason  
For me to stay with you  
When this love's not workin'  
And you can't see it thru'
